

cPanel General

Updating cPanel database list

When creating or copying a database from WHM's phpmyadmin, the database map needs to be updated, in order for that new db to show up in the cpanel accounts mysql list.

Create or copy your database with the correct cpanel username structure

"cpaneluser_dbname"

from shell run

```
/usr/local/cpanel/bin/setupdbmap
```

```
info [setupdbmap] Begin setupdbmap
```

```
info [setupdbmap] Updating MySQL users
```

```
info [setupdbmap] Processing MySQL databases and database users ...
```

```
    Adding database cpaneluser_dbname ownership to cpaneluser
```

```
    Saving MySQL DB mapping for cpaneluser
```
